IN THE SPECIFICATION:

Please amend the paragraph on Page 3, lines 2-6, as follows:

To reproduce the program included in the different TS, the data reproduction apparatus should first end reproducing the program in the present TS, ~~[[reads]]~~ read the different TS from the storage medium, and then start reproducing the program in the read different TS.

Please amend the paragraph on Page 3, lines 14-18, as follows:

In view of the above problem, the first object of the present invention is to provide a data reproduction apparatus ~~with further reduced~~ while reducing limitations ~~[[of]]~~ on switchable reproduction targets during reproduction of programs included in recorded TSs.

Please amend the paragraph on Page 3, lines 19-23, as follows:

Also, the second object of the present invention is to provide a data reproduction method ~~with further reduced~~ while reducing the possible limitations of switchable reproduction targets during reproduction of programs included in recorded TSs by the above data reproduction apparatus.
